Crawler Practice Handbook (synthetic sample)

This PDF exists so that crawlers can practise file downloads:
checking Content-Type, reading Content-Disposition, and saving
the response body to disk without corrupting binary data.

1. Always send a User-Agent that identifies you.
2. Respect robots.txt and Crawl-delay.
3. Do not hammer a server; back off on 429 / 503.
4. Only collect data you are allowed to collect.

Sample dataset rows: 8

*Generated for teaching purposes. No real personal data.*
